ENGINEERING POLYMER SOLUTIONS  
FOR THE CONSTRUCTION INDUSTRY

## World Leaders

For over 40 years Nylacast have been working within the construction industry including some of the worlds leading construction companies. Utilising the latest in CAD / CAM technology and in-house design techniques Nylacast are renowned world-wide for pioneering durable and effective solutions.

Nylacast components are typically stable, corrosion-resistant, tough, self-lubricating and wear resistant and often recognised as the perfect solution to the arduous environments encountered during construction operations. We have worked very closely with technical and design engineers to develop new applications and find the most successful alternative to outdated metal components.

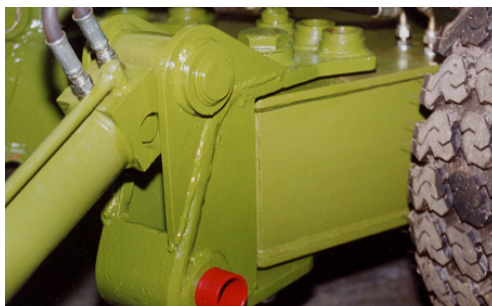

Today Nylacast consider our relationships within the construction sector as one of our strongest areas and continue to pioneer through material science and product application to best suit the requirements of the industry and our customers.

## Components with:

- › Exceptional resistance to wear and abrasion
- › High impact strength
- › Self-Lubricating Materials
- › Low co-efficient of friction
- › Light Weight - 1/7th the weight of steel
- › Cost-effective alternative to metal components
- › Complex components in any quality

## Typical Applications:

- › Thruster washers
- › Telescopic Boom Wear Pads
- › Hose Pulleys
- › Socket Liners
- › Bushes
- › Brake Link Pads
- › Slide Block
- › Pulleys/Sheaves
- › Piling Dollies
- › Outrigger Pads
- › Gears

## Nylacast offer:

- › Complex components in any quantity
- › Cost-effective alternative to metal components
- › Samples and rapid prototypes
- › Schedules and supply chain management
- › Latest CAD/CAM machine tool technology
- › In-house design facilities
- › Material selection advice
- › Support and service
